News of the GreenNS Match Project

After the fourth transnational GreenNS Match meeting held in Matosinhos, on the 14th and the 15th of May 2016, all the partners are designing and elaborating the 15 roadmaps planned in the framework of this project. The first ones will be those addressed to the following occupational profiles from agro food companies:

- Environment, Health and Hygiene in the Workplace Technician
- Food Quality, Environmental and Safety integrated management system Director
- Quality Control Technician

News of the European Union

The 2016 edition of Green Week, the biggest annual occasion to debate and discuss European environment policy, took place from Monday, 30 May to Friday, 3 June, and it was focused on the theme “Investing for a greener future”

Investing means more than money. It’s also about creating jobs and taking people out of unemployment.

It is true that a green economy offers new job opportunities. But it is also true that ensuring that current and future workers have the right skills is essential for the successful transition to a circular economy, and requires significant investment.

Bridging the skills gap and ensuring workers have the right skills means mapping employers’ fast-evolving needs, and delivering tailored training. In order to get this, “Industry and education providers need to work with one another”, as Mr. Karmenu Vella, Commissioner for the Environment, Maritime Affairs and Fisheries says.

OSTBRANDENBURG

OVIARAGÓN / GRUPO PASTORES

More than 800 livestock owners with 400.000 sheep form a solid and united cooperative group to obtain highly competitive meat as well as economic cost-effectiveness that guarantees the continuity of a way of life.

The 800 Oviaragon livestock owners breed their animals in the fields, providing them with the best attention and control to achieve a top-quality product. They also receive advice and services from 30 veterinarians and benefit from the most effective livestock supplies. With respect to feed, Oviaragon has developed its own range of food mixes, with natural feed that is suitable for each stage and type of lamb. Their research and genetic improvement section guarantees the continuity of autochthonous breeds, selecting the best animals and increasing the productivity and the quality of life of the farms.

They sell their products all over Spain and they export to several European countries, distributing more than 5,000 tons per year and controlling the entire process, from the field to the table.
